

# PV Power Plant Bobbing, UK

**Country**  
UK

**Year of Mandate**  
2017

**Year of Commissioning**  
2016

**Key Technical Data**  
Total capacity: 11 MWp  
PV technology: poly crystalline  
Inverter manufacturer:  
Schneider Electric  
Grid connection: 33 kV  
substation

## Technical Due Diligence for a 11 MWp PV Power Plant, belonging to a 150 MWp PV-Portfolio

### The objectives of the assignment were:

- Identification of technical risks and development of measures for limitation and mitigation of risks
- Review of the status of relevant licences and permits required for the construction and operation of the project
- Review of electric grid requirements and check of the compliance of the power plant
- Inspection of the power plant

### The scope of work covered the following aspects:

- Evaluation of expected annual energy yield
- Review of licenses and permits
- Technical design review
- Review of grid connection
- Support in negotiation of project contracts
- Inspection of power plant
