

Our Values

This is what **Evergy** stands for

responsible

We are aware of the trust placed in us by our clients and we take responsibility from the start. We provide genuine advice and pursue to bring the valuable experience of our team to every project. This is only possible with curious, motivated employees who like to continuously improve themselves. Evergy is aware of its responsibility to the team and we celebrate our successes as joint efforts.

solution-oriented

We are not just specialists in identifying technical problems, but we also know how to solve them. We always work for the project, never against it. With a constant stream of new ideas, we offer individual solutions for clients and employees.

customized

Our environment is constantly changing; we adapt our work accordingly and improve it. Regulations and norms are part of our everyday life and are important instruments in the technical field, but it does not always make sense to exclusively act according to them. Together with our clients and employees, we look for solutions that are guided by specific requests and individual needs.

balanced

We are only able to deliver top performance when we are motivated and satisfied. Therefore, it is vital that our work is valued and appropriately remunerated. While overtime should not be seen as granted, it is sometimes necessary. Additional effort is respected and rewarded accordingly. Together, we find the balance between interesting and challenging work and time to recharge. We firmly believe that a well-balanced workplace is the foundation for a well-balanced consultation that is in our client's best interest.

independent

Thinking and acting independently, broadens our horizons. This enables us to respond faster and more effectively to our changing environment. At Evergy we have the freedom to think beyond hierarchical or rigid structures. All suggestions are welcome and can be discussed. Financial autonomy allows us to think outside the box and be creative.

careful

We have the needs of our clients and employees at heart. Through our work, we strive to achieve something sustainable: long-term, competent employees and satisfied clients who value our performance in the long run.
